

ARYA SOHANI

AI/ML Engineer • Data Science • AI Automation

+91 896-6961-495 | aryasohani2211@gmail.com | Indore, M.P. | [LinkedIn](#) | [Github](#) | [LeetCode](#)

SUMMARY

AIML graduate with hands-on experience in AI automation, machine learning, and LLM-based applications. Skilled in Python, DSA, and building end-to-end solutions using APIs, LangChain, and deep learning models. Passionate about developing scalable AI systems and solving real-world problems.

EDUCATION

B.Tech – Computer Science (AI & ML Specialization)

2021-2025

Acropolis Institute of Technology & Research, Indore — CGPA: 7.1

Higher Secondary (12th) & High School (10th)

2019-2021

St. Arnold's School — 12th CGPA: 7.0 | 10th CGPA: 7.5

TECHNICAL SKILLS

Python, Machine Learning, Deep Learning, SQL, DBMS, Transformers/LLMs, OpenCV, LangChain, OpenAI APIs, n8n, DSA, OOP, Flutter

PROFESSIONAL EXPERIENCE

AI Automation & BDE Intern — AlphaNexis Tech Pvt Ltd

Jan 2026-Present

- Lead stakeholder meetings to translate business requirements into technical project roadmaps.
- Design and deploy end-to-end workflow automation solutions using n8n and REST API integrations.
- Collaborated with clients to identify automation opportunities and delivered AI-powered solutions using LLMs and API integrations.

AI/ML Intern — Linkites Infotech

Sept 2025- Nov 2025

- Developed and optimized ML/DL models using Transformers and LLMs for intelligent automation.
- Built LangChain-based AI workflows for real-time data processing and model deployment using OpenAI APIs.
- Performed data preprocessing, model fine-tuning, and deployment using Python and OpenAI APIs for production-ready AI systems.

PROJECTS

Plant Leaf Disease Detection

Developed a solution using CNN, VGG16, and OpenCV, achieving accuracy in identifying plant diseases. Implemented recommendations for relevant treatments to boost crop yield..

Generative AI for Interior Designing

AI-driven system generating personalized interior designs based on user preferences and spatial layouts.

Speech to Image Generation

Python pipeline converting spoken words into AI-generated images using speech recognition and image generation models.

AI Chat Game

Flutter-based prototype allowing users to create chat lobbies and interact with a simulated AI chatbot via pre-defined Q&A pairs.

Doctor Appointment Booking Bot

Built an automated bot that streamlines doctor appointment booking by handling scheduling, confirmations, and reminders without manual intervention.

Hand Detection using YOLOv8

Built a real-time hand detection model using YOLOv8, trained on Pascal VOC annotated video frames extracted from Pexels dataset with custom YOLO label conversion pipeline.

CERTIFICATIONS

- CodexIntern – Python Development Internship (Feb 2025)
- Cognifyz Technologies – Data Science Internship (Jan–Feb 2025)
- Wipro TalentNext – Java Full Stack Development (2024)
- NVIDIA DLI – Fundamentals of Deep Learning (2024)
- Infosys – Data Structures & Algorithms using Python (2024)
- IBM / Coursera – What is Data Science? (2023)
- Alibaba Cloud Certified Developer (2023)

ACHIEVEMENTS

- Secured 1st Prize in the National Symposium Competition organized by CSIR.
- Ranked among the Top 10 teams in a national-level technical competition.
